

Uintah Basin Technical College

COMMUNITY REPORT

2018

President's Letter

Welcome

To Uintah Basin Technical College (UBTech), the first technical College in the State of Utah. UBTech is a nationally recognized technical education leader and looks forward to preparing you for success in the career path of your dreams. Thousands of today's business owners, managers, and employees have educational roots and branches at UBTech.

UBTech faculty, staff and administrators are committed to the success of every student, and stand ready to serve and assist you in your individual educational pursuits. UBTech graduates are employment ready and recognized financially for the skills they obtain through our nationally accredited certificate programs. We ask all walks of life to experience a hands

Faith Burk

Practical Nursing
UBTech Student of the Year
2017-2018

Faith Burk always told herself “I can’t”—“I can’t go back to school, I can’t do anything about my financial situation, and no way can I become a nurse.”

One day she declared, “I can” and enrolled into an evening Nursing Assistant program at UBTech. Little by little, Faith kept telling herself “I can,” and by 2017 she enrolled in the Practical Nursing program at UBTech.

Faith now tells herself, “I can! Once you decide you can, doors open and a pathway appears. Through UBTech people and scholarships come to the rescue. When you decide you can do it, UBTech is the way.”

Faith is a positive student. Her happiness and joyful attitude are contagious. After promising herself that she would take advantage of every experience, she now raises her hand to opportunities whenever she can. She is excited to be UBTech’s Student of the Year, to help others, and to spread the message of the power of technical education.

Faith lives in Vernal, Utah, with her husband Daniel and six children. Her goal is to become a Registered Nurse and a Certified Nurse Midwife or Certified Registered Nurse Anesthetist.

Welding Technology Building

Over the past five years, Uintah Basin Technical College's welding programs in Roosevelt and Vernal have served over 2000 students. It's a program that has rapidly gained increasing popularity with student enrollment overwhelming available space and equipment.

Now UBTech is on the brink of opening a new 13,570 square-foot, \$4.5 million state-of-the-art welding technology building. Ground was broken on the project March 15, 2018 and construction has moved forward on schedule, with move in day projected to take place March 1, 2019.

The phenomenal success of UBTech's welding program can be attributed to the state, national and world-stage accomplishments of UBTech welding students, all thanks to the instruction and leadership provided by welding instructors: *Kevin Mitchell, Jeff Taniguchi, Rick Prather, and Ryan Taylor.*

Celebrating 50 Years of Building Careers

A look back at Uintah Basin Technical College

This year Uintah Basin Technical College proudly marks our 50th anniversary, 1968 – 2018. From humble beginnings forged by tremendous foresight, UBTech is now a nationally recognized leader in technical education. We recognize that thousands of today's business owners, managers and employees have educational roots and branches at UBTech.

Throughout our five decades, UBTech faculty, staff and administrators have shown commitment to the success of every student. They each stand ready to serve and assist every student in their individual educational pursuits, making positive impacts on the transformation of lives.

As we look forward to another 50 years, we will continue to design programs that respond to the critical needs of Uintah Basin industry and meet the educational needs of all students. Every accomplishment in and out of the classroom is a testament to the importance of what takes place at UBTech.

Our legacy of student success will continue to flourish far into the future as we invite all to experience the power of technical education, providing a hands-on approach to the world.

College President/CEO

Allred's Landscaping and Construction

UBTech Partnerships

UBTech will now have a \$10,000 scholarship available annually for single mothers donated from Allred's Landscaping and Construction. The scholarship will be available for single mothers who are residents of Duchesne, Uintah, and Daggett County. "UBTech Allred's Annuity Scholarship" will cover tuition for any of the UBTech Certificate Programs in Vernal or Roosevelt, offering mothers across the Basin a unique opportunity to earn their college degree.

You Got This Foundation

UBTech Partnerships

You Got This Foundation, Inc., (YGT), has committed \$2,000 annually in scholarships to Uintah Basin Technical College (UBTech) to support funding of basic skills training to students attending UBTech. YGT is a 501(3)(C) nonprofit foundation committed to improve the lives of area students. YGT believes that connection is the best prevention and that by offering students the opportunity to receive necessary training to become program eligible is a great way to invest their resources.

Roofing World Home Improvement Center

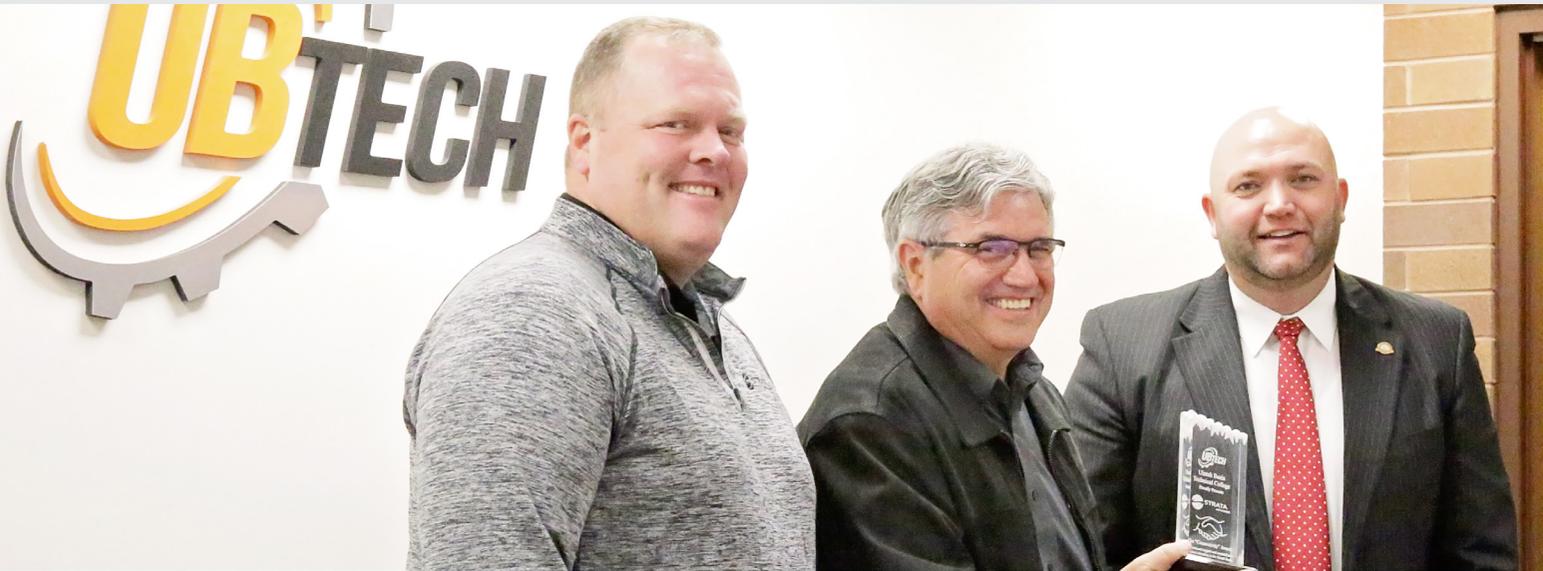

UBTech Partnerships

Rhett and Kristi Holmes are inspired by the opportunities UBTech provides for students. Roofing World will be donating the supplies for two local SkillsUSA competitions, and donating \$5,000 in scholarships every year for the next ten years. "UBTech is excited to have Roofing World as a partner of technical education. It's because of people like this that we continue to have students complete a certificate with little or no debt," said UBTech President, Aaron Weight.

STRATA Networks

UBTech Partnerships

“Technology and broadband are some of the driving forces in the ways we communicate with each other, conduct business, and lead our daily lives. As we watch this evolution & our dependency on technology grows, the need for relevant training & education in the Basin has become essential if we want to continue living in a connected world and prepare students for a technology-driven workforce.”

-STRATA General Manager/CEO Bruce Todd

STRATA NETWORKS is the leading telecommunications provider in the Uintah Basin, providing advanced voice, broadband, television, and nationwide wireless services. Headquartered in Roosevelt, Utah, STRATA celebrates over 60 years of technology expertise, exceptional customer relations, and a devout corporate social responsibility to its community. The company functions as a local cooperative, in which customers can also become member-owners of the company who may receive patronage dividends and participate in company voting processes.

\$30,000

Contributed annually to help fund equipment and operational costs

\$15,000

Per year to be awarded in scholarships

3

Partnered with UBTech to create 3 NEW programs: **IT Support Technician, Network Technician, Security Technician**

60

Over 60 potential jobs placements in the next 5 years

In April 2018, STRATA Networks announced they pledge to donate \$135,000 to UBTech to help fund a technology-based training program for students in the Uintah Basin.

STRATA's donation will be awarded over a three-year period with \$30,000 being contributed annually to help fund equipment and operational costs, and an additional \$15,000 per year to be awarded in scholarships.

As a local cooperative, STRATA has always made an effort to invest in educational opportunities, providing up to \$50,000 in additional scholarships each year through their own company scholarship program. CEO/General Manager Bruce Todd said they are looking forward to expanding their commitment to continuing education programs through this partnership and are optimistic about the new opportunities that it will bring to the Basin.

On November 13, 2018, STRATA Networks received a "Connectivity" award from Uintah Basin Technical College. This award is given

to companies and individuals for their industry connectivity and engagement with students and programs at UBTech.

STRATA has not only been an important partner in the development of new programs at UBTech, but has a long history of serving on occupational advisory committees at the college. Advisory committees meet and review program curriculum to ensure learning competencies are relevant to the needs of our local workforce.

"These new programs will enhance our local economy as students become trained in technology-based careers," said UBTech President/CEO Aaron Weight. "We are fortunate to live in a community where local employers partner with education for their workforce needs."
